

LEONARDO RUSLI

SOFTWARE DEVELOPER

+62 821-1333-6678
leonardorusli0987@gmail.com
West Jakarta

Software Engineer specializing in application development, system integration, and database migration. Experienced in building and maintaining financial reporting systems, implementing secure authentication (Google SSO), and integrating third-party APIs. Skilled in Java Spring Boot, PHP Laravel, and PostgreSQL, with a strong focus on delivering reliable, efficient, and user-oriented solutions.

EXPERIENCE

SOFTWARE ENGINEER

Pohon Dana Indonesia

November 2023 - Present

- Develop and maintain applications to support business operations (Java Spring, PHP Laravel, PostgreSQL)
- Lead solo projects such as database migration, synchronization, and new application version (V2) development to improve efficiency and user experience.
- Implement Google SSO authentication for secure and seamless login.
- Create financial reporting features (outstanding balances, aging reports, A/P reporting) to support Finance & Operations.
- Successfully integrate third-party APIs and services, improving interoperability and workflows.
- Analyze data and provide insights to enhance decision-making and customer satisfaction.
- Collaborate with cross-functional teams to gather requirements, plan future features, and ensure smooth delivery.
- Provide technical support and resolve tickets, ensuring system stability and user satisfaction.

IT INTERN

Pohon Dana Indonesia

February 2022 - October 2023

- Built automated reporting system to OJK (Pusdafil), reducing manual work and improving accuracy.
- Assisted senior developers with debugging and software enhancements across backend and frontend.
- Provided IT support, handling tickets and troubleshooting technical issues.
- Developed and tested APIs (Java Playframework, Laravel, PostgreSQL).
